

## **EXHIBIT C**

### **Listing of Claims:**

Claims 1 – 12 (canceled)

Claim 13 (new): A highway guard rail support made from tires, comprising:

at least one tire plank wherein the length of said tire plank is between 13 and 15 inches, the thickness of said tire plank is between 5 and 7 inches, the width of said tire plank is between 5 and 7 inches and said tire plank has a hole therein that has a diameter of about three-fourths of an inch.

Claim 14 (new): A highway guard rail support made from tires as defined in claim 13 wherein said hole of said tire plank is about one and one-half inches from a side of said tire plank.

Claim 15 (new): A highway guard rail support made from tires, comprising:

two or more tire planks bonded together to form a block;  
said block is between 13 and 15 inches, with a thickness between 5 and 7 inches, with a width between 5 and 7 inches and said block has a hole therein that has a diameter of about three-fourths of an inch.

Claim 16 (new): A highway guard rail support made from tires as defined in claim 15 wherein said hole of said block is about one and one-half inches from a side of said block.

Claim 17 (new): A highway guard rail support made from tires as defined in claim 15 further comprising two additional 0.4 inches wide by 0.4 inches thick strips of said tire planks placed approximately 15 inches apart on the front surface of said block wherein one side of each of said thick strip to be flushed with one side of said block so as to increase said thickness of the sides of said block by approximately 0.4 inches.
